PRODUCT DATA SHEET: GRAFFITI DEFENZ CLEVERCLEAN

FUNCTION – CLEVERCLEAN has been specifically formulated to remove spray paint, permanent marker, or other common graffiti media from surfaces protected with GRAFFITI DEFENZ SHEERCOAT and GRAFFITI DEFENZ SUPERCOAT.

CLEVERCLEAN will also work on glass, metal, and many other surfaces. Some success can be expected removing graffiti from ordinary painted surfaces when proper techniques are employed. Also, test a small area first as CLEVERCLEAN will damage some plastics.

TYPE – CLEVERCLEAN is a biodegradable proprietary mixture containing 100% active ingredients.

CHARACTERISTICS - CLEVERCLEAN has a clear, colorless appearance with a very mild amine odor. Do not thin or add other liquids to CLEVERCLEAN or the solvent action will be neutralized. CLEVERCLEAN is packaged in one-quart spray bottles and one-gallon refills.

FOR GRAFFITI REMOVAL – Use gloves and a mask. Use a 2” wide bristle brush to apply to effected area, using CLEVERCLEAN only on the graffiti, while holding a cleaning rag under the brushed area to prevent drips. Allow a moment for the solvent action to begin. Wipe with a clean rag to remove graffiti. Once the treatment is completed rinse with clean water to neutralize the solvent action.

In some cases two or more applications of CLEVERCLEAN will be necessary. A scrub brush or old toothbrush will assist in removing those particles lodged in a porous surface. Note- On large hits work from the bottom up. Clean a small area, neutralize, and continue until graffiti is removed. For maximum effectiveness avoid use in direct sunlight or when surfaces are warm to the touch.
